DR. JOHN GORUP & HAYLEY WOLFE

Understanding cervical fusion with HA-PEEK.

A guide to your options, the new bioactive HA-PEEK implant material, and questions to bring to your visit.

John Gorup, MD

Board-certified
orthopaedic spine surgeon

Talk about your treatment choices and recovery with Dr. Gorup and Hayley Wolfe.

About the procedure

In anterior cervical discectomy and fusion (ACDF), Dr. Gorup removes a damaged disc through the front of the neck. A spacer, bone graft and other implants support the area as the bones heal together.

About the implant material

CxHA combines PEEK, a durable polymer, with hydroxyapatite (HA), a mineral found in bone. HA runs throughout the material. Bone graft and your body's healing are essential to fusion.

THE STUDY RESULTS

Dr. Gorup participated in a seven-year study.

The study tracked patients' results following surgery with a new bioactive spinal implant material, called HA-PEEK.

394 PATIENTS ENROLLED
From 2019–2026

Patients rated pain and daily activities at each visit

Before surgery	6 weeks	3 months	6 months	12 months	24 months

Study results: Dr. Gorup vs the national average

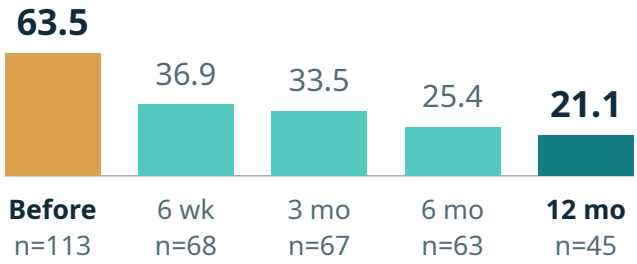

See below for Dr. Gorup's results and how this procedure may help you today.

WHAT DR. GORUP'S PATIENTS HAVE REPORTED

n = number of people answering.

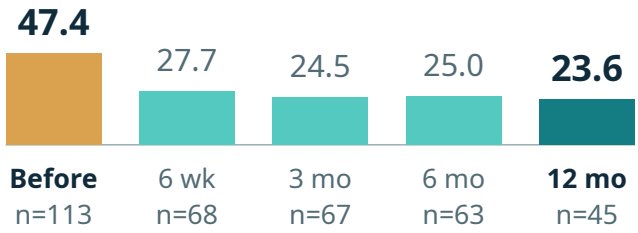

Average neck pain

0 = no pain, 100 = worst pain

Average neck disability (NDI)

0 = no limits, 100 = most limited

WHAT DR. GORUP'S PATIENTS SAID

Patients' own answers at the 12-month visit.

Satisfied at 12 months

100%

Dr. Gorup 45 patients

vs

National average 426 patients — **95.3%**

Would do it again

93.9%

Dr. Gorup 33 patients

vs

National average 342 patients — **92.7%**

Neck pain at 12 months

22.1

Dr. Gorup 33 patients

vs

National average 341 patients — **28.9**

WHAT THE SCANS SHOWED

X-rays taken as you bend measure how much the treated bones move. Steady means little or no movement, a sign the bones are fusing together.

Steady at 6 months

95.2%

Dr. Gorup 62 scans

vs

National average 628 scans — **90.4%**

Steady at 12 months

95.3%

Dr. Gorup 43 scans

vs

National average 418 scans — **92.8%**

Average movement

1.2°

Dr. Gorup 43 scans

vs

National average 418 scans — **1.4°**
